Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes By Roger Barga, Wee Hyong Tok, Valentine Fontama

Data Science and Machine Learning are in high demand, as customers are increasingly looking for ways to glean insights from all their data. More customers now realize that Business Intelligence is not enough as the volume, speed and complexity of data now defy traditional analytics tools. While Business Intelligence addresses descriptive and diagnostic analysis, Data Science unlocks new opportunities through predictive and prescriptive analysis.

The purpose of this book is to provide a gentle and instructionally organized introduction to the field of data science and machine learning, with a focus on building and deploying predictive models.

The book also provides a thorough overview of the Microsoft Azure Machine Learning service using task oriented descriptions and concrete end-to-end examples, sufficient to ensure the reader can immediately begin using this important new service. It describes all aspects of the service from data ingress to applying machine learning and evaluating the resulting model, to deploying the resulting model as a machine learning web service. Finally, this book attempts to have minimal dependencies, so that you can fairly easily pick and choose chapters to read. When dependencies do exist, they are listed at the start and end of the chapter.

The simplicity of this new service from Microsoft will help to take Data Science and Machine Learning to a much broader audience than existing products in this space. Learn how you can quickly build and deploy sophisticated predictive models as machine learning web services with the new Azure Machine Learning service from Microsoft.

Editorial Review

About the Author

Valentine Fontama is a Principal Data Scientist in the Data and Decision Sciences Group (DDSG) at Microsoft, where he leads external consulting engagements that deliver world-class Advanced Analytics solutions to Microsoft's customers. Val has over 18 years of experience in data science and business. Following a PhD in Artificial Neural Networks, he applied data mining in the environmental science and credit industries. Before Microsoft, Val was a New Technology Consultant at Equifax in London where he pioneered the application of data mining to risk assessment and marketing in the consumer credit industry. He is currently an Affiliate Professor of Data Science at the University of Washington. In his prior role at Microsoft, Val was a Senior Product Marketing Manager responsible for big data and predictive analytics in cloud and enterprise marketing. In this role, he led product management for Microsoft Azure Machine Learning; HDInsight, the first Hadoop service from Microsoft; Parallel Data Warehouse, Microsoft's first data warehouse appliance; and three releases of Fast Track Data Warehouse. He also played a key role in defining Microsoft's strategy and positioning for in-memory computing. Val holds an M.B.A. in Strategic Management and Marketing from Wharton Business School, a Ph.D. in Neural Networks, a M.Sc. in Computing, and a B.Sc. in Mathematics and Electronics (with First Class Honors). He co-authored the book *Introducing Microsoft Azure HDInsight*, and has published 11 academic papers with 152 citations by over 227 authors.

Users Review

From reader reviews:

Carlos White:

The book Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a very important thing like a book Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes? Some of you have a different opinion about book. But one aim which book can give many facts for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or details that you take for that, it is possible to give for each other; it is possible to share all of these. Book Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes has simple shape however, you know: it has great and big function for you. You can search the enormous world by open up and read a guide. So it is very wonderful.

Joseph Woodruff:

The actual book Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes will bring you to definitely the new experience of reading some sort of book. The author style to elucidate the idea is very unique. In the event you try to find new book to study, this book very ideal to you. The book Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes is much recommended to you to study. You can also get the e-book through the official web site, so you can more readily to read the book.

James Buscher:

A lot of people always spent all their free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity that's look different you can read some sort of book. It is really fun for you personally. If you enjoy the book you read you can spent 24 hours a day to reading a book. The book Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes it is extremely good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. When you did not have enough space to bring this book you can buy the e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not to cover but this book offers high quality.

Nila Cobb:

Reading a book being new life style in this yr; every people loves to study a book. When you examine a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, as well as soon. The Predictive Analytics with Microsoft Azure Machine Learning: Build and Deploy Actionable Solutions in Minutes provide you with a new experience in looking at a book.
