### Editorial Review

From Publishers Weekly

Only nine of the more than 300 Nobel prizes awarded in science since 1901 have been won by women, notes science writer Bertsch as she sets the context for the biographical essays that follow. Examining the careers and lives of 14 women scientists "who either won a Nobel Prize or played a crucial role in a Nobel winning project," she movingly depicts their battles against gender discrimination for recognition and respect and she describes the self-conflict about their roles. Subjects range from Marie Curie (1867-1934) to such contemporaries as Rosalyn Yalow, awarded a Nobel Prize in 1977 for her work as a medical physicist, and Jocelyn Bell Burnell, an astrophysicist credited, at the age of 24, with the 1968 discovery of pulsars, who made large personal sacrifices for her science. Bertsch introduces the small pantheon of women leaders in science whose careers and words offer advice and inspiration, if small comfort, to women in science today. Photos.

From Library Journal

As the subtitle suggests, this book describes the lives and struggles of 14 women who were either awarded the Nobel Prize or played a critical part in the work of the men who received it. And the "struggles" were horrendous. From the nonadmission policies of most graduate schools, even as late as 1960, to the restrictive admission policies even at the undergraduate level, simply obtaining an adequate education in the sciences was a battle for women. And, with few exceptions, most of them had to take unpaid or lowly paid jobs if they wanted to do science. Tenured positions might be offered after the Nobel Prize was won! Bertsch is a former newspaper reporter, and her background is reflected in her terse, dramatic treatment of each woman. There is an excellent set of references, as well as a thoughtful introduction and conclusion. At the outset, Bertsch asks "Why so few?"--at the conclusion, given the trials and tribulations, one wonders how so many endured. Highly recommended for all science collections.

### Users Review

From reader reviews:

**Jorge Hinkley:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a guide. Beside you can solve your condition; you can add your knowledge by the reserve entitled Nobel Prize Women in Science: Their Lives, Struggles, and Momentous Discoveries. Try to make book Nobel Prize Women in Science: Their Lives, Struggles, and Momentous Discoveries as your pal. It means that it can be your friend when you experience alone and beside that course make you smarter than previously. Yeah, it is very fortunate in your case. The book makes you more confidence because you can know almost everything by the book. So, let's make new experience along with knowledge with this book.

**Paul Butler:**

People live in this new day time of lifestyle always aim to and must have the free time or they will get great deal of stress from both day to day life and work. So , if we ask do people have extra time, we will say absolutely without a doubt. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you ever try this one, reading guides. It can be your alternative with spending your spare time, the particular book you have read is actually Nobel Prize Women in Science: Their Lives, Struggles, and Momentous Discoveries.

**Harry Fulford:**

That guide can make you to feel relax. This kind of book Nobel Prize Women in Science: Their Lives, Struggles, and Momentous Discoveries was colourful and of course has pictures on there. As we know that book Nobel Prize Women in Science: Their Lives, Struggles, and Momentous Discoveries has many kinds or genre. Start from kids until teenagers. For example Naruto or Detective Conan you can read and think that you are the character on there. Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading that will.

**Susan Hare:**

As a university student exactly feel bored to be able to reading. If their teacher expected them to go to the library in order to make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Nobel Prize Women in Science: Their Lives, Struggles, and Momentous Discoveries can make you truly feel more interested to read.
