**Ether space-time and cosmology: Physical vacuum, relativity and quantum physics** By Joseph Levy

The introduction of the ether as a key actor in physical processes, will resolve a number of paradoxes in 20th century physics, which arose because it has been dismissed. This third volume, like the previous ones, presents articles, written by experienced physicists, dealing with different aspects of the ether concept. Topics relating to quantum theory, dark energy and dark matter and a review of the basic assumptions of relativity are addressed, among others.
