
Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series)

By Weichung Joe Shih, Joseph Aisner

Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series) By Weichung Joe Shih, Joseph Aisner

Statistical Design and Analysis of Clinical Trials: Principles and Methods concentrates on the biostatistics component of clinical trials. Developed from the authors' courses taught to public health and medical students, residents, and fellows during the past 15 years, the text shows how biostatistics in clinical trials is an integration of many fundamental scientific principles and statistical methods.

Teach Your Students How to Design, Monitor, and Analyze Clinical Trials

The book begins with ethical and safety principles, core trial design concepts, the principles and methods of sample size and power calculation, and analysis of covariance and stratified analysis. It then focuses on sequential designs and methods for two-stage Phase II cancer trials to Phase III group sequential trials, covering monitoring safety, futility, and efficacy. The authors also discuss the development of sample size reestimation and adaptive group sequential procedures, explain the concept of different missing data processes, and describe how to analyze incomplete data by proper multiple imputations.

Turn Your Students into Better Clinical Trial Investigators

This text reflects the academic research, commercial development, and public health aspects of clinical trials. It gives students a multidisciplinary understanding of the concepts and techniques involved in designing and analyzing various types of trials. The book's balanced set of homework assignments and in-class exercises are appropriate for students in (bio)statistics, epidemiology, medicine, pharmacy, and public health.

- Binding: Hardcover
- 244 pages

Editorial Review

About the Author

Weichung Joe Shih, PhD, is professor and chair of the Department of Biostatistics in the Rutgers School of Public Health at Rutgers University, and director of the Biometrics Division at the Rutgers Cancer Institute of New Jersey. He is an elected fellow of the American Statistical Association and an elected member of the International Statistical Institute. He served on the advisory board of the U.S. FDA for reviewing new drug applications and was associate editor of professional journals, including *Statistics in Medicine, Controlled Clinical Trials, Clinical Cancer Research, Statistics in Biopharmaceutical Research,* and *Statistics in Bioscience*. His research interests include adaptive designs and missing data issues.

Joseph Aisner, MD, is a professor of medicine and a professor of environmental and occupational medicine at the Robert Wood Johnson Medical School of Rutgers University, director of the Medical Oncology Unit at the Robert Wood Johnson University Hospital, and co-leader of the Clinical Investigations Program at the Rutgers Cancer Institute of New Jersey. He is a fellow of the American College of Physicians and the American Society of Clinical Oncology. He serves on and chairs several National Data Monitoring Committees and has served on the editorial board of multiple journals, including *Journal of Clinical Oncology, Cancer Therapeutics, Medical Oncology, Clinical Cancer Research,* and *Hematology-Oncology Today*. His research interests include cancer clinical trials and evaluation of therapeutic interventions.

Users Review

From reader reviews:

Pamela Adair:

People live in this new morning of lifestyle always try and and must have the time or they will get wide range of stress from both way of life and work. So , when we ask do people have spare time, we will say absolutely sure. People is human not really a robot. Then we consult again, what kind of activity have you got when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative inside spending your spare time, the particular book you have read is usually Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series).

Cornell Smith:

In this period of time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher this print many kinds of book. The actual book that recommended to you is Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series) this publication consist a lot of the information in the condition of this world now. This specific book was represented how does the world has grown up. The language

styles that writer require to explain it is easy to understand. The writer made some study when he makes this book. That's why this book appropriate all of you.

Carol Berry:

As a student exactly feel bored to help reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's heart or real their interest. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that studying is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series) can make you feel more interested to read.

Nolan Russell:

Guide is one of source of knowledge. We can add our understanding from it. Not only for students but also native or citizen will need book to know the update information of year for you to year. As we know those books have many advantages. Beside we all add our knowledge, also can bring us to around the world. Through the book Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series) we can have more advantage. Don't one to be creative people? Being creative person must love to read a book. Merely choose the best book that suitable with your aim. Don't end up being doubt to change your life at this time book Statistical Design and Analysis of Clinical Trials: Principles and Methods (Chapman & Hall/CRC Biostatistics Series). You can more pleasing than now.
