Flow of Time: Quantum Gravity giving New Physics By Claus Birkholz

Apply yesterday's variation principle to Gell-Mann's quarks, pepper it with the inconsistencies of unfounded ad-hoc tactics - and there you are with grandpa's classical "Standard" model having no strategy, no future, topped only by "string" fantasies "beyond" physics, with all the great questions left open.

By marrying Planck's quanta with Einstein's General Relativity, the author is presenting the unified top-down model of a consistent "New Physics" (Quantum Gravity, including the Grand Unification) free of singularities and in accord with experiment. Space-time is bent, fully quantized and "background-independent".

Old problems of fundamental physics emerge as self-explaining: 4-dimensionality, the quark confinement, flavours, cosmic inflation, the arrow of time, the physics of Black Holes with their event horizons, the origins of (ordinary and dark) matter, and much more is dropping out as self-evident properties of nature.

Future starts to-day. Come along on the journey!

The amazing success of "New Physics"/"Neue Physik" (with almost 10.000 copies sold in a single year) gave rise to this extended, 2nd edition renamed "Flow of Time".

Main target groups: Students, physicists, mathematicians, but also people interested in philosophy or with an inclination to leave the beaten dead-end tracks of actual fundamental models of the old style in favour of more promising, novel ways.

Editorial Review

Users Review

From reader reviews:

Louise Wax:

As people who live in typically the modest era should be revise about what going on or information even knowledge to make all of them keep up with the era and that is always change and advance. Some of you maybe will certainly update themselves by reading books. It is a good choice in your case but the problems coming to an individual is you don't know what type you should start with. This Flow of Time: Quantum Gravity giving New Physics is our recommendation to help you keep up with the world. Why, as this book serves what you want and need in this era.

James Davis:

Nowadays reading books become more and more than want or need but also become a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The information you get based on what kind of reserve you read, if you want attract knowledge just go with education and learning books but if you want sense happy read one together with theme for entertaining like comic or novel. Typically the Flow of Time: Quantum Gravity giving New Physics is kind of reserve which is giving the reader capricious experience.

Anne Hahn:

The book untitled Flow of Time: Quantum Gravity giving New Physics is the book that recommended to you to learn. You can see the quality of the book content that will be shown to an individual. The language that writer use to explained their ideas are easily to understand. The copy writer was did a lot of research when write the book, to ensure the information that they share to your account is absolutely accurate. You also can get the e-book of Flow of Time: Quantum Gravity giving New Physics from the publisher to make you considerably more enjoy free time.

Charlie Seymour:

In this period globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. Typically the book that recommended for you is Flow of Time: Quantum Gravity giving New Physics this book consist a lot of the

information with the condition of this world now. This book was represented how do the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The particular writer made some exploration when he makes this book. That's why this book suited all of you.
