**Mastering 3D Printing (Technology in Action)** By Joan Horvath

*Mastering 3D Printing* shows you how to get the most out of your printer, including how to design models, choose materials, work with different printers, and integrate 3D printing with traditional prototyping to make techniques like sand casting more efficient.

You've printed key chains. You've printed simple toys. Now you're ready to innovate with your 3D printer to start a business or teach and inspire others.

Joan Horvath has been an educator, engineer, author, and startup 3D printing company team member. She shows you all of the technical details you need to know to go beyond simple model printing to make your 3D printer work for you as a prototyping device, a teaching tool, or a business machine.

### **Editorial Review**

#### **About the Author**

As an engineer and management consultant, Joan Horvath has coordinated first-of-a-kind interdisciplinary technical and business projects, helping people with no common vocabulary (startups, universities, small towns, etc). work together. Her experience as a systems engineer has spanned software development, spacecraft flight operations, risk management, and spacecraft/ground system test and contingency planning. As an educator, Joan's passion is bringing science and technology to the non-specialist in a comprehensible and entertaining way that will stay with the learner for a lifetime.

### **Users Review**

#### **From reader reviews:**

##### **Brent Cook:**

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite guide and reading a guide. Beside you can solve your problem; you can add your knowledge by the book entitled Mastering 3D Printing (Technology in Action).
