Treatment of each cancer type is discussed by stage, with coordinated guidelines on the role of each treatment modality at each stage. Each major treatment section is preceded by an updated brief chapter describing the molecular biology of the cancer and the implications of molecular biology for patient management. Full consideration is also given to cancer prevention, screening, palliative care, supportive oncology, and quality of life issues.

A companion Website offers the fully searchable online text, an image bank, links to journal articles, and a question bank.
