China since 1949 (Seminar Studies) By Linda Benson

One of the most remarkable stories of the last century is the emergence of China as a modern economic giant, poised at the beginning of the 21st century to become a great world power. China has embraced the technological advances of the late 20th century and has provided new opportunities for millions of Chinese to improve their lives. While problems have accompanied this transformation, China's future holds unprecedented prosperity for 1.3 billion Chinese and greatly enhanced international status for the government that is making this possible.

This new textbook on the People's Republic focuses on the changes which have swept through China for the past half-century. As well as providing a coherent narrative of the major events in China's recent past, China Since 1949 also provides an integrated treatment of:

- the history of women's experiences under the communist regime
- the Chinese Communist Party's treatment of ethnic minorities within China's borders and the rise of nationalism among the Mongols, Uighurs and Tibetans
- the regional differences within China and the resulting tensions
- the social implications of the Chinese Communist Party's attempts to control every facet of Chinese people's lives.

The accompanying documents providing primary source materials, the Chronology and Who's Who of key figures help to ensure that this is an indispensable text for students studying modern China.

Editorial Review

Review

'the best introduction to the subject...providing a coherent narrative of the major events of China's recent past.'

Richard Brown, *The Historical Association website*

From the Back Cover

China's rise to global prominence is one of the most remarkable stories of our time. Millions of urban Chinese today enjoy lifestyles unthinkable in the days of Chairman Mao's communist regime, and the country's leadership has made continuing economic growth their primary goal, helping to transform China into a modern world power.

Rapid change has also created tensions within Chinese society: a new middle class and a small, wealthy elite contrast with a far larger number who feel they have yet to benefit from the new economy. Corruption and abuse of power have emerged as a potent source of discontent across China's social divide.

In this fully revised second edition, *China since 1949* traces key events from the Maoist era through the Reform period to the present day.

The book:

- Explains the forces behind China's rapid growth, and its domestic and international impact.
- Examines issues of international concern, such as China's human rights record and international relations, balanced against the domestic pressures that influence China's behaviour on the global stage.
- Illustrates, through the use of world rankings, China's new position as a global economic power
- Includes two new chapters, covering contemporary society and political developments since 2000
- Incorporates new sections on Latin America and Africa, and updated material on Taiwan

Written in accessible and engaging prose, this fully updated edition of *China since 1949* is a concise but comprehensive introduction to China's recent past.
