## EMP Survival: :How to Prepare Now and Survive, When an Electromagnetic Pulse Destroys Our Power Grid By Larry Poole

Military strategists in four countries have boasted that they can cripple the U.S. with an EMP attack. Other countries have protected their power grids from an EMP attack. The U.S. power grid is still vulnerable. A widespread power outage could take years to restore because the EMP destroys electronics including circuits and transformers.

Even unplugged electronics can be damaged. Only electronics stored in a faraday cage are protected.

Fuel, communications, power, water, and food will be unavailable within hours when emergency fuel runs out. Gas pumps and even pipelines rely on electronics. Mob violence from mass evacuation of uninhabitable metropolitan areas will be a significant security issue within days. This book describes the risks and details how to prepare and survive.

Readers should also prepare for a potential nuclear attack. Radiation Survival: How to Prepare Now and Survive Radiation Exposure, is now available.

### **Editorial Review**

#### **From the Back Cover**

An EMP attack might cost \$20 billion and a lot of inconvenience or- it might cause significant mortality.

The power grid failure could be repaired in days or- it could take years.

It could happen today or- next decade.

While Congress hears testimony of our nuclear armed enemies with enhanced EMP weapons- our electric power grid is more vulnerable than ever.

Political leaders and scientists encouraged Americans to prepare for a long term power outage in Congressional testimony. They admit to doing so themselves.

This book describes our personal preparation, survival research and purchasing experience to prepare for an EMP attack.

#### **About the Author**

This book is based on our reading of survival preparation texts and congressional testimony of EMP-related hearings, combined with our experience and training. We have had careers in electrical engineering, holistic nutrition and public health sanitation. The intent is to describe our preparation, research and purchasing experience so that readers can benefit from our effort. The EMP survivalist must have some expertise in areas of communication, medicine, first aid, wild foods, solar energy, and electronics. We hope that readers will further research and enhance these plans and options for their situation.
