### **MASA: The Mann Assessment of Swallowing Ability (Dysphagia Series) By Giselle Mann**

Designed for use in bedside evaluations of patients referred for swallowing function assessment. The Mann Assessment of Swallowing Ability is a quick and reliable tool. It is an efficient and cost-effective assessment tool allowing clinicians to evaluate patients and determine which ones are true candidates for more involved instrumental evaluation. This tool may also be utilized for monitoring swallowing skills over time. The manual will include a technical manual as well as step-by-step user's guide. The user's guide section will also include information on how to use the instrument for outcomes data collection, monitoring patient status, and other clinical applications other than its primary purpose.

### **Editorial Review**

#### **Review**

"The purpose is to introduce a standardized, quick, and easy bedside test for the measurement of acquired neurological oropharyngeal dysphagia. The book meets this objective. The author also proposes that the tool be used to determine the need for more involved instrumental testing and to monitor swallowing skills over time. The intended audience includes practicing speech-language pathologists, speech-language pathology students, clinical educators in dysphagia, and other allied health professionals specializing in swallowing disorders. The assessment is a useful screening tool in determining the need for instrumental testing." -- Gloria Chi-Fishman, Ph.D. (National Institute of Health)

### **Users Review**

#### **From reader reviews:**

##### **Orlando Hernandez:**

Beside this MASA: The Mann Assessment of Swallowing Ability (Dysphagia Series) in your phone, it might give you a way to get nearer to the new knowledge or info. The information and the knowledge you may got here is fresh from your oven so don't become worry if you feel like an previous people live in narrow small town.
