Revolutionizing Enterprise Interoperability through Scientific Foundations

By Yannis Charalabidis

Organizations and enterprises are becoming more competitive about enlarging their target markets and developing innovative products and services, all the while transforming their business models to better fit the new technological era. Enterprise Interoperability (EI) is an emerging and thriving research domain, but a lack of standardized guidelines inhibit its complete reuse.

Revolutionizing Enterprise Interoperability through Scientific Foundations offers information on the latest advancements and research for Enterprise Interoperability knowledge as well as core concepts, theories, and future directions. This book is an essential resource for researchers and practitioners in the Enterprise Interoperability field and related areas.

Editorial Review

Review

Computer and information scientists and electrical and industrial engineers review recent research into how organizations can reduce barriers between each other and operate together seamlessly. The information could be helpful to researchers, practitioners, and students in computer and management sciences and to economic and business policy makers. They cover the scientific foundations of enterprise interoperability, advanced methods and tools, and perspectives and future research. Among the topics are a taxonomy of scientific areas driving the assessment of organizations' readiness, hybrid modeling for conceptual interoperability, an interoperational process engineering system for the collaborative optimization of product life-cycle, an enterprise interoperability framework based on compliance and conformance, and science-based research for advanced interoperability. --*ProtoView Book Abstracts (formerly Book News, Inc.)*

About the Author

Yannis Charalabidis is an Assistant Professor at the University of the Aegean, in the area of e-Governance Information Systems, coordinating policy making, research and pilot application projects for governments and enterprises worldwide. A computer engineer with a PhD in complex information systems, he has been employed for several years as an executive director in Singular IT Group, leading software development and company expansion in Europe, India and the US. He also serves as the scientific manager at the Greek Interoperability Centre, hosted at Decision Support Systems Laboratory, of the National Technical University of Athens, delivering high quality research in the area of interoperability. He has also been the coordinator or technical leader in numerous FP6, FP7 and National research projects in the areas of e-Business and e-Governance. He is a contributing member in several standardization and technology policy committees. He writes and teaches on Government Service Systems, Enterprise Interoperability, Government Transformation and Citizen Participation.

Fenareti Lampathaki holds a Ph.D. Degree and a Diploma - M.Eng. Degree in Electrical and Computer Engineering (Specialization: Computer Science) from the School of Electrical & Computer Engineering of the National Technical University of Athens (NTUA) and a M.Sc. Degree in Techno-Economics (M.B.A.) from NTUA, University of Athens and University of Piraeus. She is currently working as a R&D Project Manager at the Decision Support Systems Laboratory (DSSLab) of the National Technical University of Athens (NTUA). During the last eight years, she has been involved in the research and management activities of several EU-funded and national R&D projects. Her research interests lie on e-Government and e-Business Interoperability, Semantics, Services and Data Engineering, Electronic Governance and Policy Modelling, Future Internet and Enterprise Systems, Social Computing and Social Media. Her research results have been published in several international journals, edited books and conference proceedings (e.g. EGOV Conference 2008 best paper award, HICCS 2009-best paper nominee).

Users Review

From reader reviews:

Edward Baca:

Book is written, printed, or created for everything. You can learn everything you want by a reserve. Book has a different type. As we know that book is important point to bring us around the world. Beside that you

can your reading talent was fluently. A reserve Revolutionizing Enterprise Interoperability through Scientific Foundations will make you to possibly be smarter. You can feel far more confidence if you can know about anything. But some of you think in which open or reading any book make you bored. It isn't make you fun. Why they could be thought like that? Have you trying to find best book or ideal book with you?

Matthew Brown:

Precisely why? Because this Revolutionizing Enterprise Interoperability through Scientific Foundations is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will distress you with the secret the idea inside. Reading this book beside it was fantastic author who have write the book in such remarkable way makes the content interior easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of positive aspects than the other book possess such as help improving your expertise and your critical thinking way. So , still want to hold up having that book? If I had been you I will go to the guide store hurriedly.

Richard Kitterman:

A lot of e-book has printed but it differs. You can get it by online on social media. You can choose the best book for you, science, comedy, novel, or whatever by searching from it. It is known as of book Revolutionizing Enterprise Interoperability through Scientific Foundations. You can add your knowledge by it. Without making the printed book, it could possibly add your knowledge and make you happier to read. It is most essential that, you must aware about publication. It can bring you from one spot to other place.

Christopher Decker:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is composed or printed or illustrated from each source that will filled update of news. Within this modern era like at this point, many ways to get information are available for anyone. From media social just like newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Revolutionizing Enterprise Interoperability through Scientific Foundations when you necessary it?
